

# CIMET

Careers in Manufacturing, Engineering and Technology

The CIMET program is an OELLEN initiative designed to expand secondary school students thinking about career pathways in Manufacturing, Engineering, and Technology.

## Participants will -

- Visit industries to learn about what the Manufacturing, Engineering & Technology sectors produce in our local area.
- Visit local training providers.
- Connect with young ambassadors and industry mentors.
- Complete work placements with local employers.
- Learn about pathways and training options.

**Open to students  
with an interest in  
STEAM and related  
vocational  
pathways**

## Benefits of student participation

- Increased understanding of local industry opportunities
- Meeting with local industry will expand students awareness of career options and assist with subject selections for senior schooling, as well as expanding their networks for future employment prospects.
- Completing a practical work placement will give students a greater insight into various occupations.
- Visiting different training environments will give students an insight into post-secondary training.
- Learning about the different occupations within these local industries, gaining practical work experience and expanding their networks will help students to make informed decisions about their future.
